All trademarks displayed are the trademarks of the parties noted herein. *Project Planning, Implementation, and Evaluation: A Guide for Nurses and Interprofessional Teams, Fourth Edition* is an independent publication and has not been authorized, sponsored, or otherwise approved by the owners of the trademarks or service marks referenced in this product.

There may be images in this book that feature models; these models do not necessarily endorse, represent, or participate in the activities represented in the images. Any screenshots in this product are for educational and instructive purposes only. Any individuals and scenarios featured in the case studies throughout this product may be real or fictitious but are used for instructional purposes only.

The authors, editor, and publisher have made every effort to provide accurate information. However, they are not responsible for errors, omissions, or for any outcomes related to the use of the contents of this book and take no responsibility for the use of the products and procedures described. Treatments and side effects described in this book may not be applicable to all people; likewise, some people may require a dose or experience a side effect that is not described herein. Drugs and medical devices are discussed that may have limited availability controlled by the Food and Drug Administration (FDA) for use only in a research study or clinical trial. Research, clinical practice, and government regulations often change the accepted standard in this field. When consideration is being given to use of any drug in the clinical setting, the health care provider or reader is responsible for determining FDA status of the drug, reading the package insert, and reviewing prescribing information for the most up-to-date recommendations on dose, precautions, and contraindications, and determining the appropriate usage for the product. This is especially important in the case of drugs that are new or seldom used.

CHAPTER 1 Key Foundations of Successful Quality Project Planning, Implementation, Evaluation, and Management: An Overview **1**

Introduction	2
Quality Improvement Projects, Project Plans, and Project Management: Necessary Distinctions for Deliverable Outcomes	3
Differentiation of Quality Improvement Projects and Research	5
Importance of Legislation, Health Policy, Economic Conditions, Culture, Social and Environmental Factors, Values, and Norms When Designing Quality Improvement Projects	6
Historical Influences, Determinants, and Unintended Consequences/Risks Associated with Quality Improvement Projects	8
Requisite Skills and Techniques of an Improvement Team Leader and Members for Sustainable Projects in Healthcare Systems	9
Managing Projects and Teams in a Virtual Environment	11
Summary	12
Reflection Questions and Learning Activities	14
References	14
Case Exemplars	17

CHAPTER 2 Quality Improvement Projects and Quality Improvement Research: Advancing Translational Science **33**

Introduction	34
Quality Improvement	35

Quality Improvement as Systems and Processes 36

Focus on Patients 37

Focus on Being Part of the Team 38

Focus on the Use of Data 40

Ethical Considerations for Protection of Human Participants
in Quality Improvement Activities 41

Quality Improvement Programs and Quality Improvement
Research 41

Quality Improvement Research 43

Translational Science: Quality Improvement and Research
Implications 44

Summary 46

Reflection Questions 46

References 47

Case Exemplars 49

**CHAPTER 3 Implementation Science, Team
Science, and Translational Science: The Value
for Improvement Projects 53**

Introduction 54

Promoting Action on Research Implementation in
Health Sciences 56

Consolidation Framework for Implementation
Research 57

Knowledge-to-Action (KTA) Framework 61

Reach, Effectiveness, Adoption, Implementation,
and Maintenance 62

Aims, Ingredients, Mechanism, Delivery 63

Implementation Strategies 64

Value of Implementation and Team Science for Sustainable
Clinical Projects 65

Implications for Project Planning and Management 67

Summary 68

Reflection Questions 68

Learning Activities 68

References 68

Case Exemplar 71

CHAPTER 4 Forming and Managing a Synergistic Interprofessional Improvement Team 73

Introduction	74
Interprofessional Teams: Overview and Management	75
Forming, Understanding, and Managing a Synergistic Improvement Team	77
Stages of Team Development	80
Synergy and Creativity	82
Appreciative Inquiry	83
Transformational Leadership	84
Innovation	84
Common Language: A Driver for Interprofessional Project Improvement Team Successful Outcomes	85
Barriers to Team Effectiveness	87
Coaching Interprofessional Project Teams	89
Leading Interprofessional Project Teams Based on Needs and Mandates	90
Measuring Interprofessional Project Leader Effectiveness and Value	92
Summary	93
Reflection Questions	93
References	94
Case Exemplars	99

CHAPTER 5 Making the Case for a Project: Organizational and Needs Assessment 105

Introduction	106
Purpose of Needs Assessment	110
Population	110
Organization and Systems	111
Methods and Instruments	114
Instruments	114
Data Collection	115
Analysis and Use of Findings	116
Summary	116
Reflection Questions	116

Learning Activities 116

References 117

Case Exemplars 119

CHAPTER 6 Using Findings from Organizational Analysis and Clinical Needs Assessment to Frame Improvement Projects and Implementation 127

Introduction 128

Organizational Analysis: Deep Dive to Determine Needs 130

Project Life Cycle: Role of the Clinical Needs Assessment 131

Planning for Implementation 134

Developing a Project Charter 134

Model for Improvement 135

Micro-, Meso-, and Macro-Collaboration 140

Communicate, Communicate, and Communicate 140

Change Management 141

Evidence-Based Practice: Incorporates Institute of Medicine (IOM) Aims, Models, Levels, Guidelines, and Critical Appraisal 141

Quality Improvement: Measurable Outcomes and Evaluative Structures 142

Direct Impact on Patient Care, IOM Aims, Project Impact, Ethics, and Culture 142

Outcomes Evaluation, Methods, Measures, and Strategies 142

System Dynamics, Leadership, Change Agents, Opinion Leaders, Champions, and Level of Change 143

Sustainability, Champions, Outcome Impact, and Accountability ... 143

Resistance to Change Is a Reality—Embrace It. 143

Post-Project Monitoring and Evaluation 143

Project Implementation Challenges and Risks 144

Summary 145

Reflection Questions 146

References 146

Case Exemplar 147

CHAPTER 7 Synthesizing, Leveling, and Assessing the Fidelity of Evidence in Support of Project Implementation and Proposed Interventions 149

Introduction 150

Literature Synthesis and Establishing the Fidelity of Evidence ... 151

Assessing the Fidelity of Evidence	151
Organization of Evidence	152
Aligning Evidence with Project Interventions and Implementation	153
Establishing and Maintaining Fidelity of Implementation	153
Tools, Guidelines, and Techniques for Literature Synthesis and Project Alignment	154
Cognitive Maps	155
Synthesis Matrix	155
Synthesis Writing	156
Summary	157
Reflection Questions	157
References	157
Case Exemplars	159

CHAPTER 8 Building the Improvement Project Budget: Quantifying the Cost and Quality Equation. 163

Introduction	164
Key Definitions and Budgeting Principles	166
Context and Definitions for Projects, Project Plans, and Project Management	166
The Project Budget	167
Attributes of a Well-Constructed Project Budget	167
Often Overlooked Cost	168
Language and Definitions in the Budget Process	168
Types of Budgets	169
Cost Avoidance, Cost-Effectiveness, and Cost-Benefit	169
Common Pitfalls in the Establishment of Project Budgets or Expected Financial Outcomes	171
Summary	171
Reflection Questions	171
References	171
Case Exemplar	173

CHAPTER 9 Information Management in Clinical Projects: Technology, Metrics, and Measurement 175

Introduction	176
Information Technology as an Enabler for Clinical Project Success	177
Stakeholder and Partner Roles in Information Technology	178

Informatics Core Competencies and Skill Sets	178
The Value of Linking Projects to Information Systems	179
Organizational Culture and Project Management	180
Use of Evidence-Based Practice: An Intertwined Element.	181
Selecting the Right Variables to Tell Your Story.	182
Fundamental Types of Measures	182
Process Measures	182
Outcome Measures	183
Qualitative Measures.	183
Selecting the Right Data	184
Matching Populations	184
Common Data Sources	185
Benefits of Using Established Measures	185
Eliminating Unnecessary Measures.	185
Data Management Plan.	186
Step One: Define Data Needs	186
Step Two: Identify Data Sources	187
Step Three: Identify Performance Measures	190
Step Four: Design the Study	193
Step Five: Retrieve the Data	193
Step Six: Analyze the Data	196
Summary	200
Reflection Questions and Learning Activities	201
References	201

CHAPTER 10 The Institutional Review Board Process . . . 205

Introduction	206
Historical Perspective Related to Protection of Human Subjects	206
The History of the Human-Subjects Protection System	207
Definition of Research	209
Boundaries Between Practice and Research	209
Applying the Ethical Principles to Both Research and Quality Improvement.	210
Respect for Persons	211
Beneficence	211
Justice.	211
Informed Consent	212
Institutional Review Board Processes and Procedures	212
Research Purpose	213

Subject or Population	213
Design of the Study	213
Privacy and Confidentiality	214
Inclusion/Exclusion Criteria	214
Risks and Benefits from Participation	214
Outcomes	215
Informed Consent Form	215
Levels of Institutional Review Board Reviews	215
Multiple Institutional Review Boards	216
Implementation and Evaluation of Outcomes	216
Summary	216
Reflection Questions	217
References	217
Case Exemplars	219

CHAPTER 11 Big Data and Information Systems: Understanding the Value for Improvement Projects223

Introduction	224
Big Data and Information Systems Defined and the Link to Value	224
Big Data and Information Systems as a Facilitator for Improvement	226
The Importance of Stakeholders, Partnerships, and Information Systems Using Data Big or Small as Improvement Projects Are Developed	226
Keys to Positive and Sustainable Project Outcomes: The Five Vs of Big Data	227
Data Integrity, Accuracy, Relevance, and Use for Future Improvement Priorities	228
Summary	228
Reflection Questions and Learning Activities	229
References	229
Case Exemplars	231

CHAPTER 12 Measuring the Value of Projects Within Organizations, Healthcare Systems, and Globally235

Introduction	236
How Value Is Defined in Health Care	237
Measurement	237
Project Evaluation	239

Steps in Program Evaluation 239

Aligning Metrics with Project Aims 239

Case Study Application 241

Principles of Project Evaluation Methods 242

Information Dissemination: Roles and Responsibilities
 for Communication. 243

Tools of the Trade. 244

Summary 245

Reflection Questions 245

Learning Activities 245

References 246

**CHAPTER 13 Innovation, Diffusion, and
Dissemination of Improvement Project Outcomes 249**

Introduction 250

Aligning Innovation, Diffusion, and Dissemination: The Value
 for Continuous Improvement. 251

Forums and Techniques: Considerations for Disseminating
 Improvement Project Outcomes 252

Role of Appreciative Inquiry in Presentations 255

Value of Publications and Information Sharing 255

Potential Pitfalls in Dissemination 258

Summary 258

Reflection Questions 259

References 259

Case Exemplar. 261

Index 263

Preface

Textbooks are references for students, faculty, interprofessional teams, and consumers of care. As healthcare organizations are challenged to maintain a competitive edge and relative advantage, multiple strategies are required. What one views as a crisis situation in one healthcare organization may provide an opportunity for creativity and innovation in another. This situation offers transformative, transformational, and challenging opportunities. As a result, meaningful interprofessional quality improvement projects add quantum value and contribute to new evidence.

The authors' dedication as educators, administrators, clinicians, and nurse researchers led to them updating this fourth edition of the text in an attempt to meet the constant healthcare changes, as well as reflect updates in the recent release of the *Future of Nursing Report 2020–2030*, the revised *Essentials of Nursing*, and the myriad of challenges within any organization. As healthcare environments continue to require up-to-date information, the acknowledgment of interpretive design, biotechnologies, computational technologies, interprofessional project team assignments, and learning, they form collaborative improvement teams. The collective talents and insights of teams and their engagement are necessary if the challenges of providing quality, safe, and efficient care are to be met. As interprofessional teams work together, new behaviors develop and an understanding that embraces the contributions from other disciplines emerges.

The authors contend that the content in the *Fourth Edition* is not all-inclusive, but rather a snapshot for designing, updating, and evaluating interprofessional quality improvement projects that transcend a global care continuum. This edition's content provides an introspective foundation for successful project planning and management, interprofessional team management, appreciative inquiry, implementation science, team synergy, use of a needs assessment, and metrics to shape sustainable project outcomes. Based on comments from students, faculty, external reviewers, biomedical librarians, and institutional review boards, this text features essential information related to influences and determinants of projects. Based on additional comments, this edition also incorporates information on team science, big data, literature synthesis, evidence fidelity, and organizational alignment to projects.

The authors have provided information in the *Fourth Edition* that will challenge interprofessional teams to become innovative forces dedicated to developing projects that improve healthcare delivery, innovation, and discovery. These skills enhance a team's vision, which serves as a compass to guide meaningful projects and spread evidence, add value, and engender a culture of sustainable change.

James L. Harris
Linda Roussel
Catherine Dearman
Patricia L. Thomas

Acknowledgments

The authors acknowledge each of the contributors of this text, mentors who have guided our visionary careers, and the review comments from diverse individuals and disciplines represented. In an era of constant change imposed by a pandemic and need to join forces toward normalization, the call for action by transformational leaders who support and encourage interprofessional quality improvement team activities is paramount. Projects create pathways for patient-centered care, as well as opportunities for synergy, evidence-based knowledge creation, and directions for the future to meet the demands of a global society facing any future healthcare crises.

To our families, colleagues, and external reviewers who supported this edition, we offer our gratitude for the encouragement and guidance. To the staff at Jones & Bartlett Learning, your consistent support and unwavering direction are equally appreciated.
